SPORTS SIMULATOR

JURASSIC PLAYABLE

DINOSAURS ARE ALIVE IN THIS REALISTIC 3D PRE-HISTORIC ENVIRONMENT, ENSURING PLAYERS ARE FULLY ENTERTAINED

Sports Simulator has created the perfect fun Jurassic Activation, that runs directly alongside Christmas, Easter and Halloween, ensuring that all commercial facilities are extremely busy throughout the year. Introducing 40+ sports to non-players from children, less active adult's and entire families, wishing to be fully entertained. This very realistic 360° Jurassic environment has been developed featuring popular dinosaurs such as tyrannosaurus, velociraptor, triceratops, brontosaurus, stegosaurus and flying pterodactyls. The scenery includes volcanoes, mountains, rivers, beaches, pasture, palm trees, ferns, banana plants, palm plants and egg nests. Attention to detail is incredible with over 1,000+ game challenges that can be played on the easter field within this amazing scene. Commercial establishments like theme parks, sports bars, family entertainment centres, shopping malls, cinemas, leisure centres and sports clubs can capitalise on traditional festive scenes to ensure that they are now busy year-round. In addition, sponsors can also promote their product or service within the game challenges on offer by utilising the in-game advertising options. The Sports Simulator development team is currently creating Canyon, Outback, Chinese New Year scenes and some Famous Cities so family entertainment is maximised, ensuring decent profits all year round.
